DETAILED ACTION

Election/Restrictions

1. Claims 1-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 0703. Applicant's election with traverse of Group II in Paper No. 0703 is acknowledged. The traversal is on the ground(s) that the subject matter is closely related. The examiner agrees to examine Groups II and III together in the present application. Group I (claims 1-7) requires a different search, therefore the requirement is still deemed proper and is therefore made FINAL.

Drawings

2. Figures 10A, 10B and 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The abstract of the disclosure is objected to because it should not exceed 150 words. Correction is required. See MPEP § 608.01(b).

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 8-9, 11-13, 21, 23-24, 29 and 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Mishiro (US4764702).

Regarding claims 8, 11 and 12, Mishiro discloses a first elastic member (4), a second elastic member (5), an electro-mechanical energy conversion element (3,8) disposed between the first and the second elastic member, a rotor (13) that is brought into contact with a frictional surface (16); and the driving signal is applied to the electro-mechanical element in order to produce a circular or elliptical movement.

7. With regards to claim 9, Mishiro discloses the driving signal is applied to the electromechanical element (Column 2, lines 28-34).

8. With regards to claim 13, Mishiro discloses the electro-mechanical element disposed on an opposite side of the first elastic member with the third elastic member interposed there between.

9. With regards to claim 21, 23-24, Mishiro discloses an element (7) having increased diameter.

10. With regards to claims 29, 31-32, Mishiro discloses another electromechanical energy conversion element fixed to the third elastic member (8, 3).

Claim Rejections - 35 USC § 103

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 17, 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mishiro (US 4764702).

It has been held that the term "integral" is sufficiently broad to embrace constructions united by such means as fastening and welding. In re Hotte, 177 USPQ 326, 328 (CCPA 1973). In the instant case, the first and third elastic members are made integrally.

Allowable Subject Matter

13. Claims 10, 18, 22, 26 and 30 are allowed.

14. Claims 14-16, 25, 27-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

15. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach either alone or in obvious combination the limitation that the center of an anti-node of the bending vibration does not coincide with a center portion of the third elastic member in an axial direction of the vibration. Regarding claims 25, 27-28 the prior art or record does not teach the third member including a thinner portion.

Conclusion

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
